

Patent No. 7,324,737
Art Unit 2621

Docket No. PU030100
Customer No. 24498

REMARKS

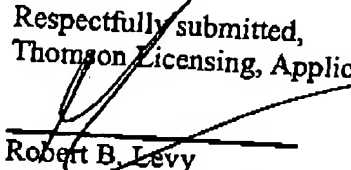

Applicant requests entry of the foregoing preliminary amendment prior to consideration of the accompanying application to re-issue US Patent 7,324,737. This preliminary amendment amends the patent specification to eliminate several typographical errors. More importantly, this preliminary amendment amends the claims to assure proper antecedent basis for the recited elements in compliance with 35 U.S.C. § 112. The phrase "content mode" is now replaced by operating mode which is clearly described in the patent specification at Col. 4, lines 60-67, and Col. 4, lines 1-48. The phrases "motion command" and "transport command" are now replaced by the phrase "motion/control mode" described in Col. 3, lines 25-40 of the patent specification.

Applicants solicit entry of this amendment and allowance of the claims. If the Examiner cannot take such action, the Examiner should contact the applicant's attorney at (609) 734-6820 to arrange a mutually convenient date and time for a telephonic interview.

No fees are believed due with regard to this Amendment. Please charge any fee or credit any overpayment to Deposit Account No. 07-0832.

Respectfully submitted,
Thomson Licensing, Applicant
